

CALL FOR PAPERS

Delphi is a pioneering interdisciplinary review of emerging technologies as seen through the perspectives of experts from the fields of **science and technology, ethics, economics, business and law**. Inspired by the idea to encourage inclusive, thoughtful – and sometimes unsettling – debates on the many opportunities and challenges created by technological progress, the international quarterly review brings together authors with different professional backgrounds as well as opposing views. Contributions to *Delphi* come in compact formats and accessible language to guarantee a lively dialogue involving both thinkers and doers.

What's in it?

Delphi reviews recent developments in **artificial intelligence and robotics, digital and financial technologies**, as well as in **bio, health and human enhancement technologies**.

We invite authors from *Delphi*'s focus disciplines science and technology, ethics, economics, business and law to contribute articles, essays and country/thematic reports and to critically review relevant books, art and media. The length of the contributions should range between 1000 and 3500 words, depending on the selected category. All submissions should be written in British English. Contributions will be subject to a quality check by experts before acceptance for publication.

Who's reading it?

Delphi is read by big picture thinkers, who are usually higher up in their institution's hierarchy and who want to know how emerging technologies shape our present and future, therefore the target audience ranges from product managers, blockchain engineers, chief science officers, policy advisors, CEOs and CTOs to philosophy professors and innovation directors.

Write for *Delphi* – What's Your Benefit?

- **Break Out of Your Silo:** Present your ideas to a new audience of experts with other professional backgrounds. Contextualise your work within the broader discourse.
- **Collaborate:** Take advantage of our network of experts from other countries and disciplines to collaborate on cross-cutting analyses of an emerging tech topic.
- **Reach Out Globally:** The review is read internationally by thought leaders in business, research and policy, giving a boost to your contribution's visibility.

Deadlines for Submission of Abstract:

The editorial team looks forward to receiving your abstracts for contributions to **Issue 1/18 by 31 August 2018**. Please send your abstract (about 300 words) to:
