

## CALL FOR PAPERS

Chemicals are a significant contributor to our way of life and therefore our economies. A safe chemical management – from extraction or production to disposal – is essential to avoid risks to human health and the environment. 10 years ago the ground-breaking law REACH came into force with the aim of a better protection of people and the environment against hazardous substances and to enhance the competitiveness and innovation of European industry and promote alternatives to testing chemicals on animals.

To answer the need for information exchange and a forum to discuss global chemical law, regulation and policy, Lexxion publisher is now creating a new international journal – the **International Chemical Regulatory and Law Review – ICRL**.

### Content

ICRL will report on the regulation, law & policy governing, inter alia:

- chemical law and regulation (regional, national, international),
- Commission decisions (ECHA opinions),
- EU and global jurisprudence,
- regulation on crop protection,
- biocide law,
- transport law for hazardous materials,
- patents/trademarks,
- licences.

### Types of Contributions

We invite you to submit your articles, country reports or case notes on the topics covered by ICRL. All submissions should be in British English and conform to the OSCOLA style of referencing.

All articles will be subject to double blind peer-review before acceptance for publication and are required to conform to the author guidelines available at: [www.lexxion.eu/icrl/author-guidelines](http://www.lexxion.eu/icrl/author-guidelines)

### Contact

The editorial team looks forward to discussing your proposals and receiving your submissions. For further enquiries, please contact
