

CONTENTS

Introduction	3
<i>Michael Rodi</i>	
Chapter 1	
Climate Change Technology Policies, Toolbox Solutions and Social Foundations	9
Comparing Environmental and Technology Policies for Climate Mitigation and Renewable Energy	11
<i>Carolyn Fischer and Richard G. Newell</i>	
Pathways to Energy Sustainability: New Instruments for Promoting Energy Efficiency.	39
<i>Thomas Schomerus</i>	
Energy, the Environment and Price-Based Instruments: Environmental Taxes as a Tool for Energy Sustainability and Climate Policy	51
<i>Kalle Määttä and Michael A. Mehling</i>	
Domestic Kyoto Implementation or Cheap Certificates? A Decision Support Tool for Policy Makers when Designing Climate Protection Strategies Considering Potential Co-Benefits	67
<i>Franz Pretenthaler and Daniel Steiner</i>	
Prospects of Renewables in the CDM Market: Potential, Barriers and Opportunities for their Diffusion	83
<i>Naira Harutyunyan</i>	
The Role of Human Actors in the Institutionalization and Application of Technological Innovations for Energy-Based Sustainable Development Projects	99
<i>Debora Ley and Hope J. Corsair</i>	

Social Science Perspectives on the Transition in the Energy System: Dynamics, Instruments and the Case of Photovoltaics	113
<i>Anne Maassen</i>	

Chapter 2

Regional Experience	125
CO ₂ Emissions Mitigation Potential in Vietnam’s Power Sector	127
<i>Nhan Thanh Nguyen and Minh Ha-Duong</i>	
Walking Before Running: Promoting Clean and Affordable Technologies in Developing Countries	151
<i>Polin Nop and Samuel Bryan</i>	
A Survey on Public and Private Actors’ Participation in a Technological Diffusion Programme of Production and Use of Biodiesel in Brazil	161
<i>Adalberto Mantovani Martiniano de Azevedo and Newton Müller Pereira</i>	
Reducing Carbon with Clean Energy Technology: Lessons from Malawi	173
<i>Lameck Nkhonjera</i>
