General information

Overview

As the interest in the economics of State aid is steadily increasing among academics, practitioners and public officials, we are pleased to bring these cross-disciplinary groups together during the **second edition of our annual conference "State Aid Control: Where Law and Economics Meet"**.

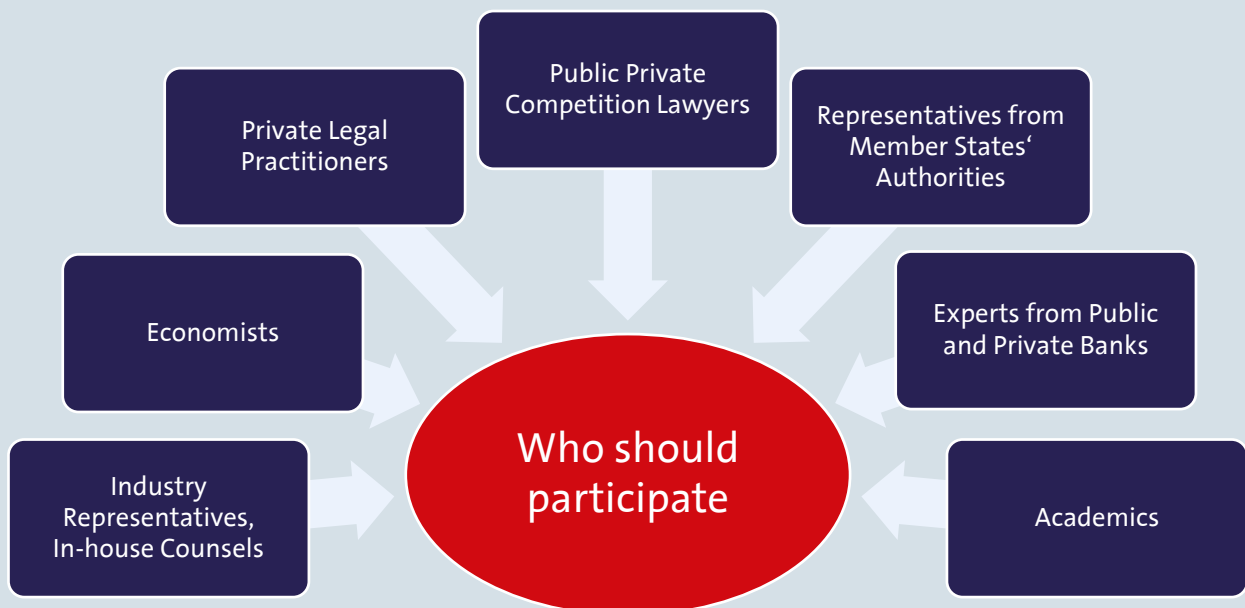

This event - organised in cooperation with Vrije Universiteit Brussel and E.CA Economics - combines **theoretical, empirical** as well as **policy-oriented contributions** on State aid from various areas of law and economics. This year we worked with a call for abstracts to set up the panels for the parallel sessions.

Interdisciplinary approaches were especially encouraged. The conference will be held in English.

Participants

The conference will bring together State aid experts and economists from European and national institutions, industry, legal practice and academia. As such, the conference is targeted to:
